ArcSight ESM - RSA NetWitness Suite Integration Guide. The 'NetWitness-ArcSight_Integrations' Zipped archive will contain documentation, required references and import files to create integrations between ArcSight ESM and NetWitness. It is broken down into three main integrations:

ArcSight ESM - RSA NetWitness Suite Integration Guide

ArcSight ESM extends the reach of Cisco threat management and response, by performing sophisticated event correlation of Cisco network events and alerts with a broader set of agency-wide event-sources (systems, databases, and applications). As a result, customers can detect threats in time to take effective action.

ArcSight SIEM - Cisco

ArcSight ESM leverages the Security Open Data Platform, whose SmartConnectors can connect to 450+ data source types to collect, aggregate, clean, and enrich your data before feeding it into your security analytics. By structuring your data, ESM makes it both more useful and more cost-effective.

ArcSight Enterprise Security Manager (ESM)

the FlexConnector parser. Parsed events are forwarded to the ArcSight ESM where all of the data from Centrify Infrastructure Services is stored, and the ArcSight Console is used to access that data. Data collection using the Windows Event Forwarding (WEF) feature: ArcSight SmartConnector supports WEF to collect Application logs forwarded by

: Periodically fetch Asset Data from ESM and calculate scores - Custom Analytics: Fetch event data and plot geo coordinates as a bubbles on a map - Command Line Utility: Fetch event data from ESM and send it to standard output

Introduction to HP ArcSight ESM Web Services APIs

Select the ArcSight SmartConnector installation folder (hereinafter referred to as %ARCSIGHT_HOME%). Set the installation type to Typical. Select the place where to create a shortcut for the connector. You can also choose not to create icons. After the contents of the binary file are unpacked, click Add a Connector.

Installing ArcSight SmartConnector (Windows)

("ArcSight") to provide complete visibility of network endpoints, including unmanaged endpoints. In addition, ArcSight users can leverage Forescout platform tools to quickly take action on network hosts; reduce network risks and control network endpoints. ArcSight ESM is a product designed for security information and event management (SIEM).

Forescout eyeExtend for ArcSight Configuration Guide

Description. ArcSight is a market leading SIEM, delivering log management and the world's best correlation engine. Using ArcSight, security operations can very quickly identify and respond to known threats, increasing SOC efficiencies and driving efficiencies in an increasingly critical business function. Interset provides a market-leading analytics platform, using unsupervised online machine learning to identify unknown threats like insider threats or targeted outside attacks such as APTs.
