Infection prevention and control (IPC) is a cornerstone of quality management and ensuring the safety of patients in hospitals [1, 2]. Principal objectives of IPC are preventing healthcare-associated infections and reducing pathogen transmission [3,4,5]. To achieve these objectives, timely detection of and effective mitigation against healthcare-associated outbreaks are imperative.

A belief is an attitude that something is the case, or that some proposition about the world is true. In epistemology, philosophers use the term "belief" to refer to attitudes about the world which can be either true or false. To believe something is to take it to be true; for instance, to believe that snow is white is comparable to accepting the truth of the proposition "snow is white".
