Monthly "all you can eat" subscription services are now mainstream for music, movies, and TV. Will they be as popular for e-books as well?

Manual For Blood Cells Atlas

The liver is an organ of the digestive system only found in vertebrates which detoxifies various metabolites, synthesizes proteins and produces biochemicals necessary for digestion and growth. In humans, it is located in the right upper quadrant of the abdomen, below the diaphragm. Its other roles in metabolism include the regulation of glycogen storage, decomposition of red blood cells, and ...

Liver - Wikipedia

LM22 is a signature matrix file consisting of 547 genes that accurately distinguish 22 mature human hematopoietic populations isolated from peripheral blood or in vitro culture conditions, including seven T cell types, naïve and memory B

cells, plasma cells, NK cells, and myeloid subsets. LM22 was designed and extensively validated on gene ...

Profiling tumor infiltrating immune cells with CIBERSORT

Tissue-specific reference data can be obtained from public databases (e.g., the GEO 25 or the Expression Atlas 26) or large cell atlas projects (e.g., the Human Cell Atlas 27, the Tabula Muris or ...

Tutorial: guidelines for annotating single-cell ...

Chan et al. use single-cell transcriptome sequencing and imaging techniques to study the heterogeneity and tumor microenvironment of clinical small cell lung cancer specimens. This analysis identifies a PLCG2-high-expressing subpopulation linked to metastasis and poor prognosis, and an enrichment of a monocyte/macrophage population with a profibrotic, immunosuppressive phenotype.
