Platinum is a moderately hard metal (MH 3.5) of low mechanical strength, with a close-packed face-centred cubic structure (BCN 12). Compared to other metals in this category, it has an unusually high melting point (2042 K v 1338 for gold). Platinum is more ductile than gold, silver or copper, thus being the most ductile of pure metals, but it is less malleable than gold.

A metalloid is a type of chemical element which has a preponderance of properties in between, or that are a mixture of, those of metals and nonmetals. There is no standard definition of a metalloid and no complete agreement on which elements are metalloids. Despite the lack of specificity, the term remains in use in the literature of chemistry.. The six commonly recognised metalloids are boron ...

### Metalloid - Wikipedia

For families that earn \$100,000 or less, the university offers large reductions in college tuition and fees. The U.S. News and World Report ranked Columbia University as the 3rd best national university in the nation. Stanford University. Stanford University was founded in 1885 in Stanford, CA, and has since become an elite 4-year university.
