To find them all, a researcher would have to study the DNA of thousands or tens of thousands of dogs, Karlsson says. “We couldn’t have a lab with thousands of dogs. It’d be extremely loud.” To get the DNA from so many dogs, Karlsson founded Darwin’s Ark. Like Wisdom Panel, Darwin’s Ark offers genetic testing for your pet.

Part 3: Human Genetics Problems . Genetic counselors are trained to detect inheritance patterns of genetic diseases based on information they obtain from the family. Imagine that you are a genetic counselor and you must solve the following cases based on the information provided. Use the following steps to solve each problem:

#### **Human Inheritance | Biology I Laboratory Manual**

NSTA's Science Scope Journal published a lab on learning the basics of genetics through "paper pet" creations. I wanted to do this lab with my students, so I put together this power point with instructions for my classes. It served as an outline for their lab report as well. BTW - My students had a lot of fun with this lab!

Strips of paper (representing DNA) are randomly selected and used to assemble a DNA molecule. Students read the DNA recipe to create a drawing of their pet, and compare it with others in the class to note similarities and differences.

#### **The Basics and Beyond: An Introduction to ... - Teach.Genetics**

Paper Pet Genetics A fun lab that allows students to practice genetics principles and also understand the random recombination afforded by sexual reproduction. Pairs of students work together to make a Paper Pet family by flipping coins to first choose parental traits and then, after developing Punnett squares, students again flip coins to see what offspring will be born into this new family.
