There are, however, six overarching principles that, when applied correctly, will make a Red Team more effective. These principles include: The Boss Must Buy In – This is probably the most important of the six principles. The leader of the organization being Red Teamed must support the efforts of the Red Team.

A red-team assessment is similar to a penetration test in many ways but is more targeted. The goal of this assessment is not to find as many vulnerabilities as possible, but to test the organization's detection and response capabilities. The red team will try to get in and access sensitive information in any way
