Unit 1 – The Building Blocks of Algebra This unit revolves around the concept of equivalency. Within this larger framework, we review and develop the real number properties and use them to justify equivalency amongst algebraic expressions.

### Unit 1 - The Building Blocks of Algebra - eMATHinstruction

2 Introduction In this Algebra 1 unit, students will explore equality, solve linear equations (with a single variable and literal equations), and then solve more specific types of equations involving percents and proportions. The major idea of the unit is identifying and performing the steps necessary to solve for a variable in a linear equation.

### Algebra 1 Solving Linear Equations Unit Plan

In this course students study a variety of advanced algebraic topics including advanced factoring, polynomial and rational expressions, complex fractions, and binomial expansions. Extensive work is done with exponential and logarithmic functions, including work with logarithm laws and the solution of exponential equations using logarithms.
