WAP4410N An FCC ID is the product ID assigned by the FCC to identify wireless products in the market. The FCC chooses 3 or 5 character "Grantee" codes to identify the business that created the product. For example, the grantee code for FCC ID: Q87-WAP4410N is Q87.

FCC ID Q87-WAP4410N Wireless-N Access Point with power ...
What worked for me was plugging the wap4410n that will act as a repeater into a router, changing the settings to allow wireless (http) browser access and then completing the rest of the setup wirelessly. Since a wap4410n has both a wired and wireless mac address, make sure you use the correct one when configuring the ap and repeater.

Cisco Wap4410n Manual - vpn.sigcloud.com.br
May I suggest you search the Internet for WAP4410N User Manual and download the PDF from the Cisco website? That will answer all your questions... see more I never used it that way, but I did look at the manual and you can specify multiple SSIDs, each with a broadcast option and a security option. You can also do MAC filtering.
